

PLANT IMMIGRANTS

Descriptive notes furnished mainly by Agricultural Explorers and Foreign Correspondents relative to the important introduced plants which have recently arrived at the Office of Foreign Seed and Plant Introduction of the Bureau of Plant Industry of the Department of Agriculture, together with accounts of the behaviour in America of previous introductions. Descriptions appearing here are revised and published later in the Inventory of Plants Imported.

No. 115.

NOVEMBER 1915.

Genera Represented in this Number.

	Page		Page
Annona	938	Lonicera	941

Gaultheria	940	Spathodea	943
Jubaeopsis	940	Zea	944

Plates:

Mangifera indica, Cambodiana Mango, natural size.
Amygdalus davidiana, Peach, natural size.

Applications for material listed in these multigraphed sheets may be made at any time to this Office. As they are received they are placed on file, and when the material is ready for the use of experimenters it is sent to those on the list of applicants who can show that they are prepared to care for it as well as to others selected because of their special fitness to experiment with the particular plants imported. Do not wait for the annual List of New Plant Introductions.

One of the main objects of the Office of Foreign Seed and Plant Introduction is to secure material for plant experimenters, and it will undertake as far as possible to fill any specific requests for foreign seeds or plants from plant breeders and others interested.

Permission to publish on application only.
